NUMERALS

I. Pure Numerals

	a	=	b			
A	D	□		one, passim.	— 298	K 132(-1[dug])
B	—D			one (sheep): 7.	[Barred signs mostly in System II: v.inf.]	
C	●	I, ■		ten, passim.	[In 225 apparently units precede tens. Cf. also 51 rev.?] b(2), theoretic analogue to a, is rare: supplied from 185(qur).	
D	—	□		sixty. Cf. total in 21 (prob. $287+160+88 = 535$). Other examples perhaps: 39, 97, 112 rev., 221 (barred?), 228: but more common sign is the following.		
E	□, U	□, □		sixty: written in pairs, □ etc. (Single: 71(?) U). 60 x 2: 66, 88, 100 60 x 3: 25, 55, 65, 256 60 x 4: 19, 55, 66, 100, 256 60 x 8: 114 60 x 17: 88 60 x 10: 19(?), 178 60 x 18: 66, 88		
				Thus a particular sign for six hundred was not generally used.		
F	—			sixty (barred). 166.		
G		■		88 ii 4: following traces of eight or more sixties. Probably <u>six hundred</u> . If so, the same tablet contains both a longer and a shorter writing of six hundred. Cf. longer and shorter writings of ten bur in System III (10 bur = sign III-H and also sign III-G repeated 10 times).		

II. Measure of Capacity

A				— and —, 29. — >, 1 Ka, 226 vii, viii. But in 18 iii 3 Ka numbered by numerals G.
B	□	□		Fractions are rare. (a) 83, 162 v, 258 (□ □), [13 4 iii 2 (school) belongs here? (b) 32, 339 i, 341 ii, 348. Fractions of the gur. Less than half? (cf. C, D, F).
C	□			37 ii (school): with ninda.
D	□			37 ii 2, 135 ii 1, 162 vi (here seems distinct from B, and greater).
E	□—			340.

F		83 i: greater than B.
G		One gur, passim. written in 85 iii, 276. Irregular writing: 6, 35.
H		etc., One gur (barred sign). 23, 32, 66, 132, 133, 136 bis, 182, 183, 185, 198, 212, 217, 218, 349. In 183 the numerals are barred in col. II; not so in col. I. Col. II contains almost the same list of names as col. I. Thus barred numerals probably indicate a second consignment of the commodity. The same explanation suits 23 i (e-ra, e-ra), and 32 ii (, assigning barley twice to same individual).
		The barred numerals occur mostly with reference to gur measure, but are possibly also as pure numerals. In 133 and 217 they refer to DUG, and are purely arithmetical if DUG indicates rather the pot than the measure of Kds.
J		Ten gur, passim
K		etc., ten gur (barred sign). 29, 66, 68, 73, 77, 110, 133, 136 bis, 144, 162, 182, 183, 185, 195, 198, 212, 217, 286, 349.
L		Numeral next above J/K. Numeral J/K occurs in multiples of 6, 7, 8 and 9. L is therefore hundred gur. (a) 83, 86, 158(?), 162 vi 5(?), 228. (b) 205b.
M		Mb: evidently barred form of Lb: 185, 222. Ma equivalent to La; and perhaps takes the place of the barred form. [does not occur] 29, 162 vi 6(?), 188. [Barred signs occur in context of first two: 188 is broken.]
N		Numeral next <u>above</u> L/M. Numeral L/M does not occur in multiples above 4. N probably - six hundred gur. 73, 158, 162, 176, 222.
P		N. barred 90, 144, 162, 185.
		All the documents which contain numerals characteristic of this system deal, so far as is indicated, with corn or meal: except 86 (Se-ninda, taken to mean loaves: see Int. V, B 2 ii).

III. Land Measure

A		— 27 ii : prob. <u>one sar.</u> 168 ii 4(?) 163 i,iii,iv ?
B	g	(?) 98 iv 3.
C	o	226 vii. [cf. 98 i 5 ??]
D	o	20 ii; 108 i, ii; 226 i i, iii i, v 3. (If this is half-gan, the rent in 20 is on $1\frac{1}{2}$ gan out of 5 bur: = one-sixtieth).
E	o	passim. <u>one gan.</u>
F	o	passim. <u>six gan.</u>
G	•	passim. <u>one bur.</u>
H	●	<u>ten bur.</u> 15, 20, 27, 147, 163, 167, 201, 365, 371.
J	◎	equivalent to H. 82, 102, 117, 127, 175, 356, 364.
K	●	In 122 numeral next above fourteen bur (G fourteen times); prob- ably in 365 and 371 next above ten bur (H). The highest multiple of H/J is 4. K therefore probably <u>sixty bur.</u>
L	●	27 iv: numeral next above H or K: perhaps hundred bur.
